OFFICE OF THE

SERIAL PLAGUE COMMISSIONER IN MYSORE.

No. (Camp) 11 Mysore DATED BANGALORE, 12th September 1908

Encl:

From

THE PLAGUE COMMISSIONER IN MYSORE.

To The Secretary to the Government of Mysore General & Revenue Departments

SIR,

I have the honor to forward herewith copy of a memo drawn up in consultation with the Deputy Commissioner and the Chief Plague officer Mysore city - regarding the formation of Wards &c and to request the favor of your obtaining Government sanction to the arrangements therein made

The services of Mr. Mahomed Jaffer not being available owing to

13

to his ill health I have in anticipation of sanction authorized the appointment of Abdul Hakim Revenue Probationer and Shuk Abdulla Deputy Inspector of Vaccination as Ward Officers and have also requested the Senior Surgeon to place the services of the latter at the disposal of the Deputy Commissioner and President Mysore City Municipality.

as a temporary measure

I have the honor to be
Sir
Your most obedient Servant

of Mr A. Ananda Rao Assistant Commissioner, were available for the purpose; but as he has been recently transferred to Tumkur District, there is no other Officer available for the above work.

I therefore, request that you will be good enough to move the Government to appoint an Officer at an early date, with necessary powers, so that the work of demolition may not be delayed any longer.

I have the honour to be,

Sir

Your most Obedient Servant

A Thanjavur City Mun

For President

5
Enl. 511

Memorandum by the Plague Commissioner after conferring with the Deputy Commissioner, Vice-President, and Chief Plague Officer, Mysore.

With a view to improve the sanitation of the Mysore City, it is necessary, first, to adopt the daily conservancy system without further delay. Steps should be taken to empty the existing privy pits, fill them with fresh earth and close them. In lieu of the pit system, daily conservancy will be introduced in accordance with the Bye-laws passed in 1898.

2. It is understood that the number of houses which have latrines with seats or platforms is about 2,232 and that of houses in which the pit system prevails is about 8,000. Also in houses in which privy seats are provided, the seats or platforms are too low to permit of a moveable receptacle being placed under them, as prescribed by the Bye-laws. In such cases, persons who can afford to alter and adapt the existing platforms at their own cost should be made to do the work within a given time—in default, they should be rigourously subjected to the penalties attaching to the breach of the Bye-laws.

3. The Municipal authorities will at once proceed with preparing a list of houses and house-owners coming under this category. As regards the poorer classes, a list will be similarly prepared and in their case the work of filling up the privy pits and substituting platforms should be done at the cost of the Municipality. The Vice-President will be good enough to prepare a list of these houses, showing the names of owners, cost of filling up pits and of putting up platforms within 7 days from this date. Where pits are filled in, provision should be made for an outlet for the drainage that used to flow into the pit. The grant for V shaped drains may be partially utilized for this work. Meanwhile he will start the work with the existing establishments.

4. It is understood that 70 additional scavengers have been engaged. These will be entertained as soon as they arrive, within 7 days from this date.

---

5. Night soil hand carts.—40 extra carts may be purchased.

6. The privy pits to be filled are estimated to be 2,000 and the cost of filling, on an average, at Rs. 5 each. The work will be taken in hand at once, and completed within a fortnight. Rs. 5,000 will be placed at the disposal of the President for this work from Plague Funds, necessary provision being made for the sum in the Budget for October 1900 with a view to adjusting the expenditure that may be incurred. The President expects to be able to finish the work within the limit allotted. The poorer classes

will themselves do most of the work and the cooly paid to them will serve as a sort of relief at this time of distress. The distress is great and prices are still high. As in Bangalore, there is complaint of people suffering from insufficiency of food. This and other works of sanitation now ordered will thus be additionally beneficial to the people.

7. 21 Extra rubbish carts at Rs. 15 each to be employed.

8. A lump sum of Rs. 5,000 will also be advanced from Plague Funds to be set apart for the construction of V shaped drains, wherever necessary, on the condition that the amount be repaid when the general drainage scheme is sanctioned, or when a loan is raised by the Municipality.

9. It is desirable that to prevent overcrowding, persons dispossessed of their houses owing to the opening out of the congested parts or their houses being condemned under the Plague Regulations, should be provided with building sites in suitable localities selected for each community. It is also desirable that sanitary houses should be built for them at a cost not exceeding the compensation awarded to them. The Deputy Commissioner will be so good as to consult the heads of communities and mark out the localities which each community may select. The localities so selected should be marked on a large scale map of the city and a sketch also should be prepared of the different types of houses proposed to be built, giving the approximate cost for each type of house. Four such different kinds of houses were ordered by me yesterday at Chetnahally camp. It is needless to point out that before a place is assigned for building, the main streets and conservancy lanes should be marked on the ground. The Deputy Commissioner and President, City Municipality, may consult the Municipal Commissioners in deciding the locality which should be assigned to each community.

10. A small working committee should be appointed at once which should have charge of running up houses for the poorer classes displaced from the City with the money awarded to them as compensation. Non-officials who are willing to render this service to the poor should be invited to sit on the committee.

CAMP, MYSORE,
11th September 1900.

V. P. MADHAVA RAO,
Plague Commissioner in Mysore.

2 L

Memo drawn up by the Plague Commissioner in the Town Hall after consulting the Deputy Commissioner and the Chief Plague Officer.

The Mysore City will be divided into 3 Wards and the following Officers will be appointed as Ward Officers with usual ward officers' allowance of Rs. 50.

As a temporary measure.
Mr. H. Narasingbhan.
" Abdul Hakim, Revenue Probationer.
" Sheik Abdulla, Deputy Inspector of Vaccination.

As Mr. Abdul Hakim is already a Magistrate of the 3rd class, Narasingbhan will now be invested with similar powers.

2. As there is no other Assistant Commissioner available for the purpose, the Vice-President will, for the present and in addition to his duties, be entrusted with the work of surveying and assessing condemned houses under Plague Regulation 6 A, published under Notification No. PG. 723 dated 23rd December 1898.

3. The Ward Officers will assist the Vice-President in the matter of surveying and assessing condemned houses. I understand there are something like 400 houses which have been condemned but which owing to want of an Officer to value them under the Regulation could not be removed.

4. 70 Supervisors have been allotted and distributed over the City. Their duties are the same as those they had to perform in the first epidimic. In addition to this, they will daily watch the progress made in filling up privy pits and introducing the daily conservancy system and also note how far the work of constructing drains ordered in the Plague Commissioner's Memo dated 11th September 1900, has progressed and report the result to the Ward Officer who will make a note of it in the Register to be opened for the purpose. It will be one of the duties of the Ward Officer to check the work done by the supervisors in this direction when he is on his rounds, and bring any short-comings and delays in the execution of works of conservancy and drainage to the notice of the President of the Municipality.

5. The Supervisors will be instructed to explain to the people the benefits of English treatment and to bring without loss of time to the houses of such persons as are willing to avail themselves of this treatment, the medical officer assigned to the Mohalla.

6. The Ward Officer and the subordinates of the Municipality will similarly interest themselves in bringing medical aid to the people. A stock of stimulants and restoratives in addition to the necessary medicines, will be always kept ready in the office of the medical officer assigned to each Mohalla. There are now 7 such Medical Officers available for treating plague cases

7. It will also be one of the duties of the Supervisors and the Officers above them to explain to the people that medical aid and comforts which they cannot command at home are available at the Erangere camp, where every arrangement for meeting caste requirements has been made, and induce both the patients and contacts to go to the camp.

8. The Supervisors should also instruct people not to handle dead rats but to remove them with a pair of tongs or with sticks and burn them.

9. I have already instructed the Chief Plague Officer that no time should be lost in taking a census of the population. This he has promised to do on the 15th instant.

10. The President will be so good as to submit a weekly statement showing the progress made in filling up privy pits, building drains and demolishing condemned houses in the City.

CAMP, MYSORE,
12th September 1900.

V. P. MADHAVA RAO,
Plague Commissioner in Mysore.

To

The Plague Commissioner Mysore

No. 3927.

Copy to the Secretary to the Govt of Mysore Revenue Department Letter ref. this No 7541/2626 dated 22.3.1901.

30/3/1901

Sir,

Adverting to your memo no 3868 dated 23rd March 1901, forwarding copy of letter no 7541/2626 of the 22nd idem, addressed to you by the Secretary to the Government in the Revenue and General Departments, I have the honor to state that since the subsidence of plague in the City, my Amildars' duties have been confined to the charge of the city municipal Conservancy Department. He is also helping

the

of the Vice President in the matter of Mahataxfa and Sayer Collections; but two such offiers of about the same status, appear to be no longer required by the municipality, and my Hayes may therefore be with-drawn from this ~~Department~~ District at once.

As regards my Bava Rao. I beg to state that as plague is still lingering in a few of the villages in the district be-sides the Kasaba Town of Gundlepet, it is desirable that he should be retained in the District till at least the 15th proxmo when I shall be able to report as to the necessity or otherwise

otherwise of his further re-
tention. In addition to
his duties as District Plague
Officer, he has been given
jamabundi work of portions
of the taluks of Chaga-
-nungla and Malavalli.

I have the honor to be,
Sir,
